Objective

Computer Science graduate skilled in full-stack development and backend systems with hands-on experience in machine learning and AI. Proficient in Python, Node.js, React.js, MySQL, MongoDB and SAP ABAP(basic). Built scalable projects like a job portal, mental health chatbot, and ML-based systems. Familiar with Git. Passionate about building intelligent, efficient, and reliable systems.

Skills

Programming Languages: Python, MySQL, C++, Node.js, React.js, JavaScript, HTML, CSS

Tools & Systems: Git, Linux, Colab, PyCharm, Networking Fundamentals, Figma, VS Code

Concepts: RESTful APIs, Database Design, Full-Stack Web Development, Machine Learning

Frameworks / Libraries: PyTorch, TensorFlow, HuggingFace Transformers, LangChain

Soft Skills: Proactive learner, adaptable to new technologies, strong analytical and problem-solving skills, collaborative team player with positive attitude.

Experience

Software Engineering Intern, Kerala Police Academy – Thrissur, India May 2025 – June 2025

- Developed an inventory management system for the Quartermaster (QM) Store using React.js, Node.js, and MongoDB
- Implemented state management with Redux and designed responsive UI/UX using Figma.
- Improved tracking and management of equipment and supplies, reducing manual effort and errors.
- Collaborated with team to design and deploy features.
- Participated in debugging and code reviews.

Education

Government Engineering College, Thrissur, Currently pursuing M.Tech in Computer Science and Engineering Sept 2024 – May 2026

- GPA: 8.5/10

Jyothi Engineering College, Thrissur, B.Tech in Computer Science and Engineering June 2020 – May 2024

- GPA: 8.3/10

Projects

Retrieval-Augmented Generation (RAG) System for PDFs 2025

- Built a Retrieval-Augmented Generation (RAG) system (ingest → embed → retrieve → answer) using LangChain, ChromaDB, and HuggingFace all-MiniLM-L6-v2 embeddings integrated with Llama 3 via Ollama. Implemented chunking, token management, and embedding optimization for efficient retrieval.
- Tools Used: Python, LangChain, ChromaDB, HuggingFace Transformers, Llama 3, PyTorch.

Thermal Image Detection & Classification Feb 2025 – July 2025

- Developed YOLOv8 and DETR-based models for object detection in thermal imagery.

- Produced detection reports and model summaries to support decision-making in traffic monitoring.

Fake News Detection System

2025

- Created a Python-based system using TF-IDF and ML models (Logistic Regression, SVM).
- Designed for real-time news verification with high accuracy and scalability.

Job Portal

2024

- Developed and tested a full-stack job portal.
- Created test cases for job search filters, application tracking, and resume uploads.
- Tools Used:TailwindCSS,Reactjs,MongoDB,Git

CareBot,Jyothi engineering college, Thrissur

2023-2024

- Designed a mental health chatbot using HTML, CSS (frontend), and Python with MySQL (backend)
- Leveraged NLP libraries (spaCy, NLTK) to generate empathetic responses and understand user input
- Added Speech-to-Text (STT) and Text-to-Speech (TTS) features for improved accessibility and user experience
- Enabled real-time communication and conversation history tracking for progress monitoring
- Conducted usability testing and refined dialogue prompts for better accessibility.

Licht App,Jyothi engineering college, Thrissur

2023

- Built a cross-platform mobile app using Flutter (Dart) to assist children with autism through an engaging, accessible interface
- Integrated backend services for real-time progress tracking and seamless data sync
- Deployed to both Android and iOS platforms using a unified codebase
- Tools Used:Dart,Hive(local storage)

Certifications

- **Programming for Everybody (Getting Started with Python)** – Coursera: Covered foundational Python programming concepts including data types, control structures, and basic data structures
- **Artificial Intelligence** – Cognizant Foundation (Tech4All): Explored AI, NLP, ML, and Microsoft Azure services through hands-on modules and real-world applications
- **Full Stack Web Development** – Skolar: Trained in web development fundamentals using HTML, CSS, JavaScript, React.js, and component-based frontend design
- **Hackathon Participation** – SheBuilds: Developed a mental health chatbot as part of a collaborative hackathon project focused on accessibility and wellness
- **SAP ABAP Programming** Udemy
